DATA SHEET

LAUNDRY SOUR & SOFTENER - PH NEUTRALIZER & FABRIC SOFTENER

Product Description:

pH balanced to eliminate skin irritation and minimize graying or yellowing caused by alkali residue. Reduces fiber stress as it softens and eliminates static cling to prolong the life of your laundry.

Color: Blue Odor: None Added

pH: 5.5 Liquid

Physical State:

Available In:

55 Gallon Drums Item# 98PSO55 15 Gallon Drums Item# 98PSO15 05 Gallon Drums

Item# 98PSO05

Directions:

Sort laundry by color, size and fabric type. Choose proper wash cycle and water temperature. During the final rinse cycle, add 1-2 oz. of Laundry Sour & Softener per 50 pounds of dry laundry. Do not use more than 6 oz. per 50 pounds of laundry to guard against anti-rewetting of fabric. Anti-rewet is the point at which too much fabric softener is applied to the fabric preventing the fabric from absorbing water. Check pH of wash water at the end of the final rinse stage before water drains. Fiber and wash water pH should typically be 5.5-6.5. Adjust usage level of Laundry Sour & Softener accordingly. Note: Do not mix with other chemicals.

First Aid:

In case of contact: Skin: Wash with plenty of water for 15 minutes. Remove contaminated clothing and wash before reuse. Eyes: Immediately flush with large quantities of water, holding eyelids open for at least 15 minutes. Seek immediate medical attention. Ingestion: Give large quantities of water. DO NOT induce vomiting. If vomiting occurs spontaneously, keep head lower than lungs to prevent aspiration of chemical into lungs. Call a physician immediately. Never give anything by mouth to an unconscious person. Inhalation: Remove to fresh air. In all cases, seek medical attention if irritation persists.

Storage:

Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials and food and drink. Use appropriate containment to avoid environmental contamination. Keep container tightly closed and sealed until ready to use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.
